

All-in-One Platform for Operational Resilience

Disruption is inevitable — but resilience is built.

Navvia empowers you to assess, strengthen, and govern the processes that keep your business running — even under stress. Our platform brings together assessment, process modeling, and requirements documentation to help organizations manage and improve the people and processes that drive operational resilience.

Why Choose Navvia?

Your people and processes are the foundation of resilience. Navvia gives your organization the visibility to pinpoint weaknesses — and the capability to act on them.

Whether you're navigating regulatory pressure, digital transformation, or escalating cyber risk, Navvia equips you to align teams, govern operations, and continuously improve the processes that matter most.

It's more than process modeling — it's a platform for operational resilience, built from the inside out.

Key Benefits:

- ◆ **Assess What Matters.** Navvia comes preloaded with security and process assessments aligned to NIST CSF 2.0 and IT Service Management (ITSM) best practices. Covering cybersecurity, governance, continuity, and service delivery, these questionnaires help you evaluate the maturity of your people, processes, and supporting technologies. Target stakeholders by role, function, or department for precision insight.
- ◆ **Harness AI to Get Fast Actionable Insights.** Your data is automatically compiled into a secure, private AI environment to generate a professional-grade report — complete with executive summaries, risk scores, prioritized recommendations, and a roadmap for action. The report equips your leadership with the clarity to make fast, confident decisions.
- ◆ **Fix What's Broken.** Once gaps are identified, use Navvia Process Designer to build and document the processes required to strengthen resilience. Generate SIPOCs, RACI charts, user stories, and compliance-ready documentation — all aligned to your assessment results. Accelerate improvement using a built-in library of IT and business process templates. Close the loop from insight to improvement without ever leaving the platform.

Navvia: Operational Resilience — Assessed, Documented, Delivered

Navvia gives you the tools to evaluate resilience, document processes, and drive continuous improvement — all in one secure SaaS platform. Start with targeted assessments, then turn AI-powered insights into action using built-in process design and governance tools.

Resilience Starts with Process

Navvia provides a comprehensive library of ITSM and business process templates, empowering you to assess, design, and govern the workflows that support operational resilience.

- ◆ **Cybersecurity and IT risk management** establishes the foundation for protection and governance
- ◆ **Supplier and third-party oversight** ensures external dependencies are controlled and aligned
- ◆ **Software development** builds secure, resilient systems from the ground up
- ◆ **Validation and testing** ensures readiness before changes are deployed
- ◆ **Change and release management** implements tested changes safely and efficiently
- ◆ **Infrastructure and platform management** maintains the stability and security of the operational environment
- ◆ **Monitoring and event management** detects anomalies and enables early incident response
- ◆ **Incident and problem management** resolves disruptions and prevents recurrence
- ◆ **Service continuity and disaster recovery** ensures business-critical operations recover during major events

From Assessment to Action

Our built-in tools make it easy to:

- ✦ Distribute targeted assessments to internal and external stakeholders.
- ✦ Track responses in real-time with automated reminders.
- ✦ Generate AI-powered reports to measure cybersecurity capability and identify gaps.
- ✦ Design and document resilient processes using built-in modeling and export tools

Key Features

- ✦ **Secure by Design**
Built on Microsoft Azure with end-to-end encryption, access controls, and private AI — your data stays protected at every stage.
- ✦ **Scalable & Flexible**
Easily deploy across departments, business units, or client portfolios — from dozens to thousands of users.
- ✦ **Expert-Guided Onboarding**
Navvia provides training, best-practice templates, and ongoing support to ensure fast time-to-value.
